

Southern Illinois Power Cooperative

Lake of Egypt Dredging Policy

The Lake of Egypt was built by Southern Illinois Power Cooperative (SIPC) for the purpose of supplying cooling water for the electric power generating station. It is to this end that SIPC requires the ultimate quality of water and environmental surroundings.

1. Property owner must have a **current** Shoreline Agreement with SIPC.
2. Property owner must ensure that the original contour of the lake is not to be changed.
3. Property owner must ensure that the sediment is secured from being washed back into the lake.
4. Property owner must take steps to ensure that enriched soils taken from the lake do not cause an odor problem or become an unsightly distraction on the shoreline.
5. Property owner must ensure that the quality of the lake water is not adversely affected in any way.
6. Property owner must ensure that this dredging does not infringe on neighboring properties or interfere with neighbors' access to or use of the lake.
7. Property owner must assume full liability for this action and hold SIPC fully harmless for damages arising from this permit.
8. **This Dredging Permit Policy must be signed, dated and returned along with the completed Dredging Permit Application on the reverse side.** Applications will be processed for review on the 15th of each month and written approval or denial of the application will be mailed to the property owner after the 1st of the following month. Please return this document to the SIPC Administration Building or mail to: Southern Illinois Power Cooperative, 11543 Lake of Egypt Road, Marion, IL 62959.
9. All dredging work must be completed with one (1) year from the date of approval. Permits may be cancelled at any time should these guidelines be violated.
I fully understand and will abide by Southern Illinois Power Cooperative's Lake of Egypt Dredging Policy as outlined above.
